

Seamless online payments for your merchants

emerchantpay is a powerful payments platform enabling merchants of all sizes and across verticals to accept online payments using our eCommerce payment gateway. Our partnership programme gives you access to leading eCommerce shopping carts, flexible integration options, robust anti-fraud solutions, customer support and so much more.

Best-in-class shopping cart integrations and local payment methods

Robust anti-fraud solutions

All our eCommerce solutions are secure with market-leading anti-fraud software and 3D Secure, further protecting merchants from illegitimate transactions.

We help you support your merchants

Our Tech Support team operate 24/7, 365 days a year and are always on hand to assist you with all your eCommerce-related queries and issues, including support during a merchant's initial integration.

Payment pages with flexible integration options

Our payment platform offers the following integration options to match your merchants' unique business needs.

Hosted payment page

- Customisable payment page with simple integration
- Re-direct, pop-up and iframe solutions available depending on merchant's preference.

Client-side encryption

- Fully customised payment page and checkout process
- Superior UX with reduced costs involved with PCI compliance for the merchant.

Server to server integration

- Complete control over payment pages and customer journey with direct API integration
- Ideal for enterprise-level merchants processing sheer volume of transactions
- Supports sale, pre-authorisation, capture, recurring, subscription, refund and pay-outs
- One-click subsequent payments with tokenisation.

Virtual terminal

With our virtual terminal solution, your merchants can accept card not present transactions and over the phone payments. Key features include:

- Easy to use interface.
- Dashboard with payment data and records of every card transaction.
- Access to numerous users with customisable user access permissions.
- Lightweight version accessible through smartphones and tablets.

Pay by link

With our Pay by link solution, merchants can generate payment links and distribute via email or text, discrete links directing to a tailored checkout via emerchantpay's secure payment pages.

Genesis omnichannel

Our Genesis gateway provides visual charts, enabling quick insights into real time data. It gives merchants the ability to review daily and monthly processing volumes, chargeback and fraud ratios, billing statements as well as access to both our Virtual Terminal and Pay by link products.

Supported currencies

Our solution enables merchants to process transactions in multiple currencies as well as to receive their settlements in multiple currencies. We process in over 150 currencies while our settlement currencies include EUR, GBP, PLN, NOK, SEK, DKK, CHF, CAD and USD.

Tokenisation

emerchantpay's Genesis gateway enables your customers to support tokenisation on their websites. Tokenisation enables you to offer your customers the ability to pay with a previously saved card.

Benefits include:

- Reduced PCI compliance burden
- Secure online payment processing
- Improved customer journey and reduced drop-off rates
- Save as many cards as preferred for a single user
